

Odette Funeral Director

Md / Late Victorian Bier

Circa 1869

Every Bier has a story.

Classical Biers Ltd purchased this Bier in July 2016, from a company in Driffeld, Yorkshire. When purchased it consisted of a multi-coloured steel frame and wheels only, no wooden stretcher and the tyres were worn down to the rims.

Work commenced on the Bier in February 2018 when it was stripped down and high gloss black powder coated. Whilst this was in the workshop an oak sub-frame was made and carpenters made a new stretcher as close as they could to the old pictures of this style of Bier.

In April 2018 the steelwork was assembled and fitted to the new sub-frame. New tyres were made by a local tyre company to Grantham and four solid brass hub caps made. The new stretcher was delivered in May and fitted shortly after so completing the project by early June 2018.

In June 2019 Odette Funeral Director became the proud owners of this Bier and will now use it for show and also to continue with funeral work.

This Bier is around 150 years old, just imagine the stories it could tell...
